EDUCATION

Duke University **Durham, NC**

B.S. in Economics & B.S. in Computer Science (AI and Machine Learning Concentration) | GPA: 3.97/4.00 *May 2027*

- Relevant Coursework: Machine Learning, Linear Algebra, Econometrics and Data Science, Probability, Data Structures
- Honors: SEO Career Fellow, Dean's List with Distinction (2025), Global Fellow, Mac Anderson Scholar (study abroad)
- Study Away (2025): Aix-en-Provence and Paris, France (all coursework in French); Duke in New York (1 of 15 selected)

WORK EXPERIENCE

UBS **New York City, NY**

Global Markets Sales & Trading Summer Intern *June 2026 – August 2026*

- Built a daily market dashboard in Python that uses an LLM to summarize key moves in plain language; launched it on the desk and refined it through rounds of trader feedback until 30+ traders and salespeople used it before each market open
- Analyzed 2.9M+ equity executions to diagnose an underperforming liquidation algorithm; isolated losses to one execution mode in high-spread, high-volatility names (−13.4 bps vs. +8.4 bps); the trading desk implemented my recommendations
- Designed a reusable AI-assisted backtesting workflow in Python that lets teammates test any systematic strategy without starting from scratch; used it to build a wheat futures strategy on 13–19 years of market data that held up out-of-sample

SMILO (Small Islands Organisation) **Marseille, France**

Research and Strategy Intern *July 2025 – August 2025*

- Benchmarked 3 paid funding-tracking platforms against building in-house; recommended a hybrid option under $500
- Built the custom side with APIs, RSS feeds, and scraping tools, automating the team's tracking of 15+ funding sources
- Produced a 25-page strategic report on biodiversity credit markets; recommended 3 pilot models and market entry plans

China Resources Trust **Hong Kong, China**

Public Markets Data Engineering Intern *May 2025 – July 2025*

- Automated daily T/T+1 reporting for post-trade operations staff across 1,000+ structured trust products, refining the Python tools through several rounds of user feedback to cut reporting errors by 70% and reduce their manual workload
- Became the go-to for data requests, building 5+ self-service Python scraping apps that 20+ colleagues ran to pull market and product data on demand, replacing one-off manual requests with reusable tools that teams could run on their own
- Collaborated with regional product teams to integrate the tools into live reporting workflows across multi-asset portfolios

Yingke Law Firm **Shenzhen, China**

Legal Intern *May 2024 – August 2024*

- Represented lawyers' needs in building the firm's first legal tech system, an LLM-based tool for document review, case summaries, and drafting; turned their workflows into requirements, tested outputs, and relayed their feedback to engineers
- Reviewed 10+ capital markets and technology cases firsthand, learning the lawyer workflows the tool needed to automate

LEADERSHIP & EXTRACURRICULAR EXPERIENCE

Duke Alpha Kappa Psi Business Fraternity **Durham, NC**

Co-President *August 2024 – Present*

- Lead a 100+ member chapter and its 12-person executive board, building recruiting partnerships with 10+ companies
- Rebuilt the sophomore career bootcamp curriculum for 45 students, with 95% securing their target summer internships

Durham Community Incubator **Durham, NC**

Head of Partnerships *August 2024 – May 2025*

- Secured partners that gave winning local founders a year of free workspace and training to help their early startups grow
- Managed $1,500+ in donations each semester to fund early-stage entrepreneurs selected through our pitch competition

Duke Energy and Climate Club **Durham, NC**

Project Manager *September 2023 – May 2025*

- Led a 5-person team that worked with a methane reduction client to define which customers to target, then analyzed 4M+ well records to identify and prioritize 30+ potential customers and presented our final recommendations to the client
- Scoped a gas decarbonization client's needs, then delivered a 20-page white paper on carbon capture tech and regulation

SKILLS & INTERESTS

Skills: Mandarin (Native), French (Proficient); Python (pandas, NumPy, scikit-learn), SQL, kdb+/q, Java, C, Git, Excel
Interests: Duke Club Triathlon, Hiking, French Cinema, Chinese Cuisine
